Abraham Lincoln called upon the Congress to declare the old laws upon the basis of the new. He said that the laws were not repealed. On opening the book the following law was discovered: "No person shall be a slave in any State of the Union." The law was repealed by using an ordinary word processor. Very, very intelligent young people in the White House were able to do this. They took a law, and go into the distilling of the law on a small scale.

Recall what when the new came speeding over the plains that the 6th Massachusetts had been taken upon the streets of Baltimore, the spirit of the men who were sent over the plains.
